1651 OGNAY *Alap* (1665) 180 Not in prophaner Arts, like Popish Pigs, To pettitoe-it on the Organs Jigs.

[Note. *Pettito*, -toes, was in 17th c. taken by some (e.g. Skinner, 1671) as = *F. petite* (lit. 'little goose') the giblets of a goose, which is thus given in Cotgrave: '*La petite oye*, the giblets of a Goose, also, the bellie, and inward, or intralls, of other edible creatures.' The extended sense in the second part of this definition is not mentioned by Littré (who has a number of transferred senses of a different kind), and it may really have been an English extension, and may show the actual way in which a word meaning the giblets of a goose was extended to the analogous parts cut off in dressing a pig or other animal. Among these were the feet, to which the pl. *pettitoes* would seem naturally to point, and to which it may soon have been appropriated (cf. the quot. from Florio 1598). But if this is the history, it must have taken place within the space of a generation, since the first example of 'a pygges pettitoes' is of 1555, and *pettitoes* was evidently applied to toes or feet by 1589. It is to be noted that Cotgr. has also '*Pettitose* [Fr.], the garbage of fowle (an old word)', but this is not given by Godefroy, and may be some error. It may be worth inquiring whether *pettito* was not once, a simple adoption of Olt. *pettito* little, petty, small (Florio), quasi 'petties', petty items.]

[Note. The phonological relation of *pue*, *pue*, *pew*, to OF. *pue*, *pue*, offers difficulties. For the sense, cf. 16th c. Dutch (Brabantish) *pue* or *puyde* (which must have

been taken from OF). Plantin 1573 has '*an Puyde*, va lieue enleud au marché, ou contre l'hostel de la ville, pour proclamer arrests, ou publier ordonnances'; Kilian 1599, *Pue*, *puyde*, podium, pulpitum, suggestum, suggestum, rostra, suggestus lapideus', Hexham 1678, '*Pue*, a Pue, or place elevated in a Market, to Proclaim or to Cry of any thing', cf. *Mod. Du de fra* the front of a town-hall or other building. Of the L. sing. *podium*, Du Cange gives one of the mediæval senses as 'Lecturnum, anlecturnum in ecclesia, ad quod gradibus ascenditur', i.e. a lectern or reading-desk in a church, to which one ascends by steps; in Italian, Florio (1598) has '*puggio*, a hill or mounting side of a hill, a blocke to get up on horsebacke'. (So occasionally in Eng. *horse-pew* = horse-block. see N. & Q. xth s. IV. 27, 8 July 1905) These point to the series of senses, base, or raised structure to mount or stand on, raised place to stand on in making a public speech or proclamation, 'stump', rostrum, esp. in a church, a raised lectern, reading-desk, pulpit, or the like, whence, generally, place elevated above the floor for any purpose; particularly, sitting place on a raised base. But it is not impossible that this last sense, which seems to be peculiar to Eng., may have originated in that of 'balcony, balustrade' (see the Etymology), esp. if the name was first applied to a range of seats raised against the wall.]

PH, a consonantal digraph, having usually the phonetic value of F. It was the combination used by the Romans to represent the Greek letter Φ , ϕ or φ , named ϕ i, Φ i. This letter, cognate with Skr. ϕ h (and so with Germanic ϕ), was in early Greek written Π H, and was a real aspirated ϕ ; it was subsequently often written Π ϕ , $\pi\phi$, and had then prob. nearly the same sound as German ff ; but by the second century B. C. it had sunk into a simple sound, prob. the bilabial spirant (the sound made in blowing through the lips). As the Roman F was dentilabial, like mod. Eng. f , the Romans in earlier times represented the Greek ϕ not by F, but by PH; in the time of the Emperor Severus, however, the two began to be confused, and from c. 400 were treated as identical. Hence in late popular and mediæval Latin, and in the Romance languages, f was often substituted, as it is now regularly in Italian and Spanish (e.g. *fantasia, filosofia, Filippo, fotografico*). This was also the case to a great extent in Old French, and in Old and early Middle English (see PHARISEE, PHILISTINE, PHANTOM, PHEASANT), but here, under the influence of the Latin forms, most words so written were subsequently altered back to ph , the preponderance of which is particularly notable in Gower. Exceptionally the f remains in mod. Eng., as in *fancy* (= *phantasy*), *fantastic*. In all modern words of Greek derivation (e.g. in *phano-*, *philo-*, *phospho-*, *photo-*, *phyto-*) ph is alone found.

One consequence of these conditions was that in the 13th, 16th, and 17th c., ph was frequently substituted for f in words not of Greek origin, esp. in words that were somewhat rare, the scribes apparently taking ph as a more learned, and thus presumably more correct, spelling. Many instances of this will be found under F, and among the cross-references given below, as in *phalucco*, *pham*, *phane*, *phang*, *pharman*, *phlaser*, *philhorse*, *phlunot*, etc. This spelling is often retained in *phalabeg* = *filibeg*, and in certain interjections, *phew!* *phoo!* *phoo!* where perhaps it may have been adopted to express the simple bilabial ('lip-breath') consonant (the sound made in blowing) as distinct from the labio-dental f . Modern phonologists, e.g. Mr. A. J. Ellis in his 'Palaeotype', have used ph as the symbol of the bilabial sound. Greek had the initial combination $\phi\theta$, in Roman spelling *phth*. This was difficult for the Romance nations, and in the only early word of this class, *phthisicus*, was reduced to *phth*, *th*, or simple *t*. See PHthisic, etc. In mod. F. words in *phth* are now normally pronounced θ -; in Eng. the ph is generally mute and the th pronounced, but in scientific words many scholars pronounce θ -, a combination which is quite as easy as st in *sphere*.

Ph (pronounced f) is also used to represent Hebrew Φ (without dagesh), and even initial Φ (according to the Masoretic pointing, with dagesh) in proper names which have come to us through a Greek form with Φ . See PHARAOH, PHILISTINE, SERAPH. In the Roman spelling of Indian languages ph represents the true aspirated ϕ (Φ of Sanskrit), and this is occasionally the origin of ph in alien words. cf. PHULKARI.

In Philipstal's 'phantasmagoria' the figures were made rapidly to increase and decrease in size, to advance and retreat, dissolve, vanish, and pass into each other, in a manner then considered marvellous.

Phello- (fēlō), combining form of Gr. *φελός* cork. **Pheloderm** Bot. [Gr. *βέρμα* skin], a layer of parenchymatous cells containing chlorophyll, formed in the stems of some plants from the inner cells of the phellogen; hence **Phelodermal** a., of or pertaining to the phellogen; **Phellogen** Bot. [see -GEN], the layer of meristematic cells from which the cork-cells are formed, the cork-cambium, so **Phellogene tic** a., producing cork, of the nature of phellogen; **Phellogene nio** a., of the nature of or pertaining to phellogen.

1875 BLUNNETT & DYER *Sachs Bot.* 90-1 In some cases the phellogen of the periderm gives rise not only to cork-cells, but [to] permanent parenchyma cells containing chlorophyll which Sanio terms the suberous cortical layer (Phellogen). In such cases, the phellogen lies between the periderm and the phellogen, the outer of its daughter-cells producing cork-cells, the inner phellogen. 1884 BOWEN & SCOTT *De Bary's Phaner.* 545 The periderm consists of the phellogenetic meristem (= phellogen), and the tissues derived from it, which include a stratum of Cork-cells, to which usually, but not always, phellogenetic or peridermal parenchyma, the Phellogen of Sanio, is added. *Ibid.* 549 The number of the phellogenetic layers is in most species very small, in comparison with the cork-layers which appear in the same space of time.

Phen-, **pheno-**, formative element in *Chem.*, (for *phen(o)-*) f. Gr. *φαίνο*-shining, *φαίνε*-iv to bring to light, cause to appear, show; *φαίνε*-iv to come to light, appear. First used by the French chemist Laurent, 1841, in 'hydrate de phényle' and 'acide phénique', names which he applied to the substance subsequently called PHENOL. These names referred to the fact that the substance was a coal-tar product, arising from the manufacture of illuminating gas. Hence *phen-*, *pheno-* was gradually used as the basis of the names of all the bodies derived from benzene (i. e. phenyl hydride, which French chemists proposed to call *phène*). See PHENE, PHENIO, PHENOCOLL, PHENOL, PHENOMETHOL, PHENYL; also the following:

Phenacetin (fēnās sītūn), the acetyl derivative

of phenetidin, the ethylic ether of paramidophenol, hence called also *para-acet-phenidin*, $C_6H_4OC_2H_5NH(CH_3CO)$; it occurs in white shining crystals, without taste or odour, and is used as an antipyretic. † **Phenamide** (fēnāmīd), a synonym of phenylamide or aniline. † **Phenamyol**: see quot. **Phenanthraquinone**, a substance, $(C_6H_4CO)_2$, related to phenanthrene, crystallizing in shining orange yellow needles. **Phenanthrene**, a solid hydrocarbon, $(C_6H_4CH)_2$, prepared from crude anthracene (with which it is isomeric), crystallizing in colourless shining laminae. **Phenazine**, $C_8H_4N_2C_6H_4$, crystallizing in long yellowish needles. **Phenazon**, a febrifuge prepared from coal-tar, called also antipyrin. **Phenetidin**, the ethyl derivative of amidophenol. **Phenetyl**, ethyl phenyl ether, or phenate of ethyl, $C_2H_5OC_6H_5$, a volatile aromatic-smelling liquid; hence **phenetyl** red = COCCININ, $C_{14}H_9O_3$.

Phenomenal (*fēn'menāl*), *a.* (*sē*) Also *phæn-*. [f. PHENOMENON + -*AL* so mod. F. *phénoménal* (1875 in Littré).]

1. Of the nature of a phenomenon; consisting of phenomena; cognizable by the senses, or in the way of immediate experience, apparent, sensible, perceptible. (Opposed to *real*, *absolute*, etc., and in Philosophy to *noumenal*.) Also *absol.*, the *phenomenal*, that which is cognizable by the senses.

1845 COLERIDGE *Aids Refl.* (1848) I. 205 The Mosaic narrative thus interpreted gives a just and faithful exposition of the birth and parentage and successive movements of phenomenal sin (peccatum phenomenon; crimen prius in unum et commune). 1856 EMERSON *Nature, Idealism* Wks. TAIT *Mind in Matter* (1892) 3 When the positivist demands acceptance of the phenomenal as the ultimate, the position is felt to be inadmissible.

2. Of, relating to, or concerned with phenomena, esp. with the phenomena of any science. 1840 WHEWELL *Philos. Induct. 3. *as sē. pl.* Things of the nature of phenomena. 1878 G. D. BOARDMAN *Creative Wish* 289 (Cent) In the matter of elements, the new earth will be identical with the old, in the matter of phenomenals, the new earth will be different from the old.

4. Of the nature of a remarkable phenomenon (PHENOMENON 3); very notable or remarkable, extraordinary, exceptional; 'prodigious'.

Phenomenalism, [*f. prec.* + -ISM.]

a. That manner of thinking which considers things from the point of view of phenomena only. b. The metaphysical doctrine that phenomena are the only objects of knowledge, or the only realities; externalism.

1865 J. GROTE *Explor. Philos.* I. 1 I shall call then by the name of 'phenomenalism' that notion of the various objects of knowledge which go to make up the universe which belongs to the point of view of physical science. 1865 *Reader* 8 July 29 It seems to have no clear superiority over the law of gravity, or any other generalization of phenomenalism. 1877 E. CARP *Philos.* Kant II. ix. 402 Kant's Phenomenalism. The doctrine that the objects of our knowledge are merely phenomenal.

So **Phenomenalist**, one who holds or advocates phenomenalism; hence **Phenomenalist** *a.*

1856 DOVE *Logic Chr. Faith* I. in § 1. 83 We must conclude that both the materialist and phenomenalist are wrong. 1880 T. C. MURRAY *Orig. & Growth Ps.* ix. 285 He [G. H. Lewis] differs from the modern phenomenalist alone in his result. 1865 J. GROTE *Explor. Philos.* I. 92 A view more or less phenomenalistic is natural from the first to our manner of existence here.

Phenomenality, *rare*. [*f. as prec.* + -ITY.] The quality of being phenomenal; something that is phenomenal, a phenomenon.

1884 J. B. STALLO *Concepts & The. Mod. Physics* 201 Phenomenalities are the deliverances of sense. 1884 tr. *Lotze's Metaph.* 380 With respect to the Phenomenality of Space, I have argued that the appearance both of Space itself and of the changes which take place in it, is to be referred to real events which do not take place in Space.

Phenomenalize, *v.* [*f. as prec.* + -IZE.] *trans.* To render phenomenal, to conceive or represent as phenomenal. Hence **Phenomenalization**, the action of phenomenalizing.

1870 J. C. SIMON in *Contemp. Rev.* XIII. 405 This doctrine [of Hegel] that the Whole of Being is phenomenal—consisting of the process which we commonly call Thought or Thinking, and which we may call Phenomenalization. 1881 FRASER *Berkley* 73 Phenomenalization not being possible in the absence of sense-conscious spirits, the world, it is argued, could not have existed before man, if its reality is only phenomenal. *Ibid.* 112 Berkeley phenomenalises finite things, but not finite persons.

Phenomenally (*fēn'menāl*), *adv.* [*f. as prec.* + -LY.] In a phenomenal manner or degree. a. In relation to phenomena. b. Extraordinarily, notably, surprisingly.

1867 DE QUINCEY *Lessing Wks.* 1859 XIII. 291 Fixed bodies, or individual things he [Homer] paints only phenomenally, or through their participation in these fluent actions. 1886 *Manch. Exam.* 15 Mar. 5/4 Describing the weather as phenomenally severe for the season.

Phenomena see PHENOMENON.

† **Phenomenic**, *a. Obs. rare*. Also *phæn-*. [f. PHENOMENON + -IC.] Of the nature of a phenomenon; = PHENOMENAL 1. So † **Phenomenical** *a. Obs.*, relating to phenomena. = PHENOMENAL 1 b.

Phenomenism (*fēn'meniz'm*) *Philos.* Also *phæn-*. [f. PHENOMENON + -ISM.] = PHENOMENALISM 1 b. So **Phenomenist**, a holder or advocate of phenomenism; hence **Phenomenist** *a.*

Phenomenize, *v.* [*f. as prec.* + -IZE.] *trans.* To make phenomenal or apparent to the senses or mind; to treat as a phenomenon.

1860 J. YOUNG *Prov. Reason* 33 The ego of consciousness is only the manifested, the phenomenized ego. *Ibid.* 245 Phenomena are phenomena of something actual behind them, which they phenomenize, and thereby reveal.

Phenomenology (*fēn'men'ol'ōj*), [*f. PHENOMENON + -LOGY.*] a. The science of phenomena as distinct from that of being (ontology). b. That division of any science which describes and classifies its phenomena.

1797 J. ROBINSON in *Encycl. Brit.* (ed. 3) s.v. *Philosophy* § 47 This part of philosophy may be called Phenomenology. 1836-7 SIR W. HAMILTON *Metaph.* vii. (1877) 121 If we consider the mind merely with the view of observing and generalising the various phenomena it reveals, we have one department of mental science, and this we call the phenomenology of the mind. 2. In philosophical use: That of which the senses or the mind directly takes note, an immediate object of perception (as distinguished from substance, or a thing in itself). Opposed to NOUMENON.

Phil, form of PHILO- used before a vowel or h.

-phil (fīl), **-phile** (fīl), combining element repr. Gr. *φίλος* loving, dear. In Greek, found only in certain personal names, where it means 'dear, beloved', as *Δίφίλος* (dear to Zeus), *Θεόφιλος* (dear to God). In med. and mod. L. often used as a second element in form *-philus*, *-phila*, with sense 'lover, loving' (e. g. *botanophilus* (Linn.) lover of plants, amateur biologist, *amunophilus*, generic name). Hence in French words *-phile*, in Eng. *-phile* or later *-phil*, as *Anglophil(e)*, *Russophil(e)*, *Slavophil(e)*, *Turcophil(e)*, for which forms with the prefix PHILO- are more correct etymologically; so *conchophil(e)* (shell-loving), *gastrophil(e)*, *oxyphil(e)*, etc. Hence also **-PHILOUS**, q. v.

Philately (filat'li) [ad F *philatélie*, f. Gr. *φιλ(ο)-*, *PHILO-* + *ἀρετής* free from tax or charge, *ἀρέτεια* exemption from payment (cf *ἀρετίας* without payment, free, *franco*). Proposed by M. Herpin, a postage-stamp collector, in *Le Collectionneur de Timbres-poste* (15 Nov. 1864).

(When a letter was 'carriage-free' or carriage-prepaid by the sender, it was formerly in various countries stamped *FREE*, or *FRANCO*, the fact is now indicated by the letter bearing an impressed receipt stamp, or its substitute an adhesive label (commonly called a postage-stamp), for the amount, the Greek *ἀρέτης*, being a passable equivalent of *free* or *franco*, has for the purpose of word-making been employed to express the *freemarker*, *franco-bolton*, *franco-mark*, *frank-stamp*, or 'postage-stamp', and so to supply the second element in *philately*.)

The pursuit of collecting, arranging, and studying the stamped envelopes or covers, adhesive labels or 'postage-stamps', postcards, and other devices employed in different countries and at different times, in effecting the prepayment of letters or packets sent by post; stamp-collecting.

1865 *Stamp Coll Mag* 1 Dec 1862 He [M Herpin] proposes the word *philatélie*, which we anglicise into 'philately'. Twelve months have glided on and the French terms *philatélie* and *philatelia*, as well as their English equivalents 'philately', 'philatelist', and 'philatelic', have become household words in the postage-stamp collecting world. *Ibid.* Advs. The works of the Philatelic Society of France 1867 *Philatelist* I 37 A poster to the non-initiated in philately. 1881 *Athenæum* 1 Oct 431/2 It is possibly a question whether the science should properly be called philately or tumbrophily.

Philo- (fil), before a vowel (or *h*) usually **phil-** (fil), repr. Gr. *φίλος*, *φίλ-*, combining form from root of *φίλ-ειν* to love, *φίλ-ος* dear, friend (cf. *μίσ-ο*, *μίσ-ο*, from *μίσ-ειν* to hate, *μίσ-ος* hate, hatred). The number of compounds so formed in Greek was very great; usually they were adjs., having derived sbs. and other words, and capable themselves also of being used as sbs.; e.g. *φιλόσοφος* loving wisdom, a lover of wisdom, whence *φιλοσοφία*, *φιλοσοφικός*, *φιλοσοφείν* to philosophize, etc.; *φίλος* fond of birds, *φιλορνίθια* fondness for birds, etc. Among these were some formed on national names, as *φίλλαν* loving the Hellenes or Greeks, *φιλολάκων* loving the Lacedæmonians. Many of the Greek compounds have come down (frequently through Latin, and usually with formative suffixes) into English; and, on the model of these, *philo-* (*phil-*) has been employed to form new compounds, the second element of which is properly Greek, but often Latin, and even, esp. in nonce-words, English or in Eng. use. *Philo-* has thus become a living element, esp. with national names, as *philo-German*, *philo-Russian*, *philo-Turk*, and the like.

Examples are: *phil-archæologist*, *-athletic* [cf. Gr. *φιλαρχηγής*, *-αθλητικός* [Gr. *φίλμπος*] (loving hymns), *-orthodox*; *phil-botanist*, *-botanist*, *-cathartic*, *-catholic*, *-dramatic*, *-dramatist*, *-felon*, *-garlic*, *-mathematical*, *-musical*, *-mystic*, *-mythology* (love of fables), *-mythical* [Gr. *φίλομυθία* love of talk], *-pagan*, *-peristernion* (pigeon-fancying), *-pig*, *-poet*, *-publican*, *-radical*, *-radpole*, *-theorist* [cf. [Note. *Lapis philosophorum* occurs in works attributed to
 Raymond Lully (1234-1315), and in those of Arnouldus de
 Villa Nova (1240-1314). Probably it was used earlier, it
 appears in various medieval works of uncertain age or
 doubtful authenticity, e.g. in the *Classici Mediceo-Sapientum*
 attributed to Arterius or Artesius, whose date has been put
 by some c. 1150. In some of these also we find *lapis phi-
 losophicus*, *l. philosophicus*. But the earlier works (e.g. the
 medieval Latin *De Investigatione Perfecti Magisterii*),
 passing as translated from Geber (Abu Musâ Ja'far al-Sufi),
 usually refer to it simply as *Lapis* 'the Stone', or *noster*
lapis 'our stone'. Albertus Magnus (1200-82), who doubted
 the transmutation of metals, refers to it as *lapis quem*
philosophi laudant uirgine, 'the stone which the philosophers
 everywhere laud', and *lapis quem honorat philosophi*. It
 is thus possible that *philosophorum* originated later, as an
 identifying adjunct to *lapis*, as if 'the Stone, of which all
 the philosophers speak', 'the Stone of the philosophers',
 and that the descriptive phrase grew at length into a specific
 name or title. It will be seen that the correct form is not
Philosopher's, but *Philosophers' stone*.]

Gr. φλογιστόν, neuter of φλογίζω burnt up, inflammable, vbl. adj. from φλογίζω to set on fire, f. φλόξ, φλογ- flame, ablaut deriv. of φλεγ-, root of φλέγω to burn.] A hypothetical substance or 'principle' formerly supposed to exist in combination in all combustible bodies, and to be disengaged in the process of combustion; the 'principle of inflammability'; the matter of fire, conceived as fixed in inflammable substances

This use of the term and the theory connected with it were introduced by Stahl in 1702, in his ed of Becher's *Physica Subterranea* of 1669. The phrase 'esse phlogiston' had been used by Sennert (in 1619) in the sense of 'the being inflammable', inflammability or combustibility as a quality of some substances, but not regarded as a substance or principle. The existence of phlogiston was denied by Lavoisier in 1775, and though stoutly maintained by Priestley, the belief in it was generally abandoned by 1800

1. A mythical bird, of gorgeous plumage, fabled to be the only one of its kind, and to live five or six hundred years in the Arabian desert, after which it burnt itself to ashes on a funeral pile of aromatic twigs ignited by the sun and fanned by its own wings, but only to emerge from its ashes with renewed youth, to live through another cycle of years.

(Variations of the myth were that the phoenix burnt itself on the altar of the temple at Heliopolis, and that a worm emerged from the ashes and became the young phoenix. See also PHENIX².)

(Note. The relation of *Phenix* to other senses of Gr. φοινίξ is obscure; see note to PHENIXIAN. It could hardly be the Phœnician bird, since it was at Heliopolis in Egypt, where the cult of the phoenix (in Egypt. *benhi*) was coeval with the city, that Herodotus learned the legend about it. It might perh. be 'the red', with reference to the prevailing colour of its body (ῥά μὲν χρυσόκρομα τὸν πτερόν, δὲ δὲ ῥυθρία ἐς τὰ μαλίστα, Herod. II. 73), or, as some think, as an emblem of the sun in its perpetual setting and rising again. See Roscher *Lexikon d. griech. u. röm. Mythologie*, s. v.]

|| **Phenix²** (fēniks). *Bot.* [mod. L. (Linnaeus), a. Gr. φοινίξ the date palm, a date: see PHENICIAN.]

Various speculations connecting the date-tree with the mythical bird, PHENIX¹, were current from the time of Pliny or earlier: see quot. here, also 1601 in PHENIX¹ 1, and the Latin *Carmen de Phœnice*, attributed to Lactantius (a. 325). Some have supposed a much earlier connexion the Egyptian name of the phoenix was *benhi*, that of the date (fruit and tree) *denir* or *denia*, whence Coptic *benne*. But Egyptologists hold the two words to be unconnected. Some would explain φοινίξ the date, as 'the red fruit.'

3. (*spec. talking phonograph*). An instrument, invented by Thomas A. Edison in 1877 (patented 30 July), by which sounds are automatically recorded and reproduced.

The aerial sound-vibrations enter a mouth-piece, and cause vibration in a thin metal diaphragm having attached to it a steel point, which makes tracings (as in the PHONAUTOGRAPH) upon a sheet of soft metal or hard wax fixed upon a revolving cylinder, by means of these tracings the diaphragm, whose vibrations originally produced them, may be caused (by again turning the cylinder) to repeat these vibrations, and thus reproduce (more or less perfectly) the original sounds.

8. Prefixed to the names of chemical salts, etc.,

employed in photography). Thus: **Photo-to-sa lt**,

beam of light is caused to produce a photographic
image at some precise instant of time, e. g. so as
to show the exact time at which a star crosses the
meridian. So **Photo tochronographic a.**, pertain-

1. An instrument for ascertaining the degree of sensitiveness of photographic films to the chemical action of light; an actinometer.

1849 *Art Jnl.* 96 With the photographometer of Mr. Claudet this is easily ascertained. 1883 R. HUNT *Man. Photogr.* 149 M. This instrument he called a Photographometer.

Photography (fōt'og'grāf'ī), [f. Gr. φῶς light, PHOTO- + -γραφία writing, delineation: see -GRAPHY.]

So far as is known, photography was introduced, along with *photographic* and *photograph*, by Sir John Herschel, in a paper read before the Royal Society on 14 March 1839. (They may have suggested themselves to him as combining the approved elements of Talbot's *photogenic* and Niepce's *heliographie*, and as being more suitable than either.) They gradually took their place as the general terms, in French, *art photographique* appears in the *Comptes Rendus* of the *Académie des Sciences*, VIII. 714, 6 May 1839; *photographie* and *photographique* were the terms used, for the subject generally, by *Alago*, in his *Rapport* to the Chamber of Deputies on the project of Daguerre's pension, 3 July 1839; they are in common use in tome IX of the *Comptes Rendus* (July to Dec. 1839) see the *Table des Matières*.

1858 G. SHADWELL in *Sutton's Photogr. See **RADIOPHONE**.

1880 A. GRAHAM BELL in *Frail. Franklin Inst.* CX 246 We have named the apparatus for the production and reproduction of sound in this way 'The Photophone', because an ordinary beam of light contains the rays which are operative. 1880 *Athenæum* 25 Sept. 405/2 The sensibility of the metal selenium to the action of the solar spectrum recommends it as the most favourable substance for use in the 'photophone', as the new instrument is called. 1889 PRELECT & MAIER *Telephone* 104 Bell and Sumner Tainter have constructed an apparatus, to which they gave the name of 'photophone', which enabled them to reproduce words at a distance by the aid of luminous rays.

Hence **Photophonic** (-fō'nīk) *a*, pertaining to or produced by the photophone, **Photophony** (fōtō'fōnī), the use of the photophone; the conveyance of sound-vibrations by means of light.

1880 A. GRAHAM BELL in *Athenæum* 4 Dec. 747/3 (*title of paper*) On Methods of preparing Selenium and other Substances for Photophonic Experiments. 1881 S. P. || **Phyllotaxis** (filōtāk'sis). *Bot.* [mod. L., f. Gr. *φύλλο-ov* leaf + *τάξις* arrangement] The arrangement or order of leaves (or other lateral members, e.g. scales of a pine-cone, florets of a composite flower, etc.) upon an axis or stem; the geometrical principles of such arrangement. Also **Phyllotaxy**.

The principal kinds of phyllotaxis are (1) the *gyrate* or *verticillate*, in which a number of leaves (two or more) stand at the same level, forming a pair or whorl; and (2) the *spiral* or *alternate*, in which each leaf stands singly, their points of insertion forming a spiral (the *genetic spiral*) round the stem; in the latter case the phyllotaxis is expressed by a fraction denoting the angle (or portion of one turn of the spiral) between two successive leaves; thus in a 4 phyllotaxis there are 5 leaves in every 4 turns of the spiral.

1857 HENRIEY *Elem. Bot.* § 60 A particular study of those laws has been pursued, under the name of Phyllotaxy. 1863 DARWIN in *Life & Lett.* (1887) III. 57 Do you remember telling me that I ought to study Phyllotaxy? 1875 BENNETT & DYER *Sachs' Bot.* 173 In a 4 phyllotaxy, the 6th member stands over the 1st, the 7th over the 2nd, and so on.

The genus *Phylloxera* was named in 1834 to include a plant-lice which was observed to dry up the leaves of the oak in Provence, in 1868 Planchon showed that the vine disease was caused by a new species, which was constantly found on the roots of affected vines, and which he named *P. vastatrix*. In the United Kingdom, every medical practitioner is now required to have a qualification as a Physician and also as Surgeon, so that a general practitioner usually describes himself as 'Physician and Surgeon'. The use of 'Physician' or 'Surgeon' alone usually implies that the person so styled is in practice a specialist in that branch. So especially with the designation 'Consulting Physician'.

Physics. [*Plural of PHYSIC* *a.* used *subst.*, rendering *Li. physica* neut. pl., *a. Gr. τὰ φυσικά* lit. 'natural things', the collective title of Aristotle's physical treatises; as an Eng. word, plural in origin and form, but now construed as a singular: cf. *dynamis*, *mathematicus*, etc.]

1. Natural science in general; in the older writers esp. the Aristotelian system of natural science; hence, natural philosophy in the wider sense. Also, a treatise on natural science, as *Aristotle's Physics*.

The application of the term has tended continually to be narrowed. It originally (from *Arist.*) included the study of the whole of nature (organic and inorganic); Locke even included spirits (God, angels, etc.) among its objects. In the course of the 18th cent. it became limited to inorganic nature, and then, by excluding chemistry, it acquired its present meaning. See 2.

Philos.* in *Encycl. Metaph.* (1847) II. 635/1 Then arose . . . Lex.* *Physics*, term for that science which treats of the nature of the qualities which beings derive from birth, in contradistinction to those acquired from art—of the whole mass of being, comprising the universe—and of the laws which govern those beings, natural philosophy.

2. In current usage, restricted to The science, or group of sciences, treating of the properties of matter and energy, or of the action of the different forms of energy on matter in general (excluding Chemistry, which deals specifically with the different forms of matter, and Biology, which deals with vital energy). See *quots.* 1900.

Physics is divided into *general physics*, dealing with the general phenomena of inorganic nature (dynamics, molecular physics, physics of the ether, etc.), and *applied physics*, dealing with special phenomena (astronomy, meteorology, terrestrial magnetism, etc.). There is a tendency now to restrict the word to the former group.

B. STALL *Concepts & The. Mod. manifestations of the same fundamental energy. 1900 W. WATSON *Testib. Physics* 2 We are led to define Physics in its most general aspect as a discussion of the properties of matter and energy. It is, however, usual to exclude the discussion of those properties of matter which depend simply on the nature of the different forms of matter (Chemistry), as also the properties of matter and energy as related to living things (Biology). The line of demarcation separating Physics and Chemistry has never been very clear, and of late years has practically vanished.

Phyto- (fai to, fî to), combining form of Gr. *phûron* a plant, lit. that which has grown, f. *phûv* to produce, pass, and intr. to grow; used in forming scientific words, chiefly botanical.

As the *v* in Gr. *phûron* is a short vowel, the etymological pronunciation of *phûr* in all the following words is (fî), but the general tendency in English to view *y* as a long *i*, as in *my*, *cry*, etc., has made the (etymologically erroneous) pronunciation (fai) all but universal. It is adopted in all the pronouncing dictionaries from Walker onward.

Formerly also called (in It., Fr., and Eng.) **FORTERIANO**, and now generally **PIANO**.] A musical instrument producing tones by means of hammers, operated by levers from a keyboard, which strike metal strings, the vibrations being stopped by dampers; it is commonly furnished with pedals for regulating the volume of sound (see **PEDAL** *sb.* 1 *b.*). The pianoforte (the invention of which is usually ascribed to B. Cristofori of Padua c. 1710) is essentially a dulcimer provided with keys and dampers, but in other respects imitates the harpsichord and clavi-chord, of which it has taken the place.

2. Erroneously applied to a colonnade or covered gallery or walk surrounding an open square or piazza proper, and hence to a single colonnade in front of a building; an ambulatory with a roof supported on the open side by pillars. Now rare.

This arose from the Italian custom of constructing colonnades round open squares or courts, and appears to have begun with the vulgar misapplication of the name to the arcade built after the designs of Inigo Jones on the north and east sides of Covent Garden, London, instead of to the open market place or area.

[Note. Our earliest examples (17th c.), being from the formerly Spanish West Indies, with the existing Cuban Spanish *piquinini* (Picardón *Dice Voces Cubanas*, 1849), suggest Spanish derivation, on the other hand, the Surinam form is more naturally derived from Portuguese, which moreover has the recognized dim. *pequeno*, not used in Spanish. Stedman gives *peeken*, *peekenenee* in Eng. phonetic spelling; the Dutch of Surinam is *piquin*, klein, weinig, jong, kind, jonger, kroost' (Focke, *Neger-Engelsch* IVb. 1855). But, wherever first used, the word was prob. soon carried from one colony to another, it may even have arisen in the Portuguese possessions in Guinea, and have been carried by slaves to various parts of America; witness the readiness with which it has been adopted by natives in Africa and Australia, in the 19th c. The Cape Dutch form *piquinini* may have been brought from the Dutch West Indies, or acquired from English, or from Portuguese (to which also some attribute the Rhodesian use). Some have suggested that the word is not a dimin., but a connotation, = Sp. *pequeño niño* little child, or Pg. *pequeno negro*, now in Surinam *piquin* *negre* 'negerkind', 'kroelen' (Focke). But the word is not confined to children, being essentially an adj. meaning 'very little, tiny'.]

Pick (pick), v. 1 Forms: a. 1? *pic* (1) *an*, 4 *pyken* (5-yn), *pyken*, 4-9 *Sc* and *north. dial* *pyke*, *pyke*. *β*. (1-6 *pyk*), 5-7 *pyke*, 6 *pycke*, *pyoque*, *Sc. pyk*, *pykk*, 6-*pyck*. [This vb. is found with long and short *i*, *pyken*, *pyk(h)en*, *pyke*, *pyk*, of which the former is app. the earlier, but the latter the surviving form in Standard Eng, though *pyke* (pick) survives in the same senses in northern and some midland dialects. The earliest known trace of the word is in the *vbl* sb. *pycung* (? *i* or *ē*), a gloss on *L. stigmata*, in *Corpus Gloss*. c. 725, implying a vb. *pycan* (? or *i*) or *pycan* to puncture. MS. f. of the OE. Chronicle has, anno 796, a verb uncertainly read *pycan* or *pytan*, more prob. the latter. Otherwise no examples have yet been found before 1300. In sense 1 there is evident connexion with *Pick* sb. 1, *Pike* sb. 1, and (esp. in 1 b) some agreement of sense with *F. piquer* (which is similarly related to *pic*); but the sense-development in Eng. is very different from that of *F. piquer* and the cognate *Pr.*, *Sp.*, *Pg.* *picar* and *It.* *piccare*, which adhere always more or less closely to the sense 'puncture, pierce, prick, sting', a notion which in Eng. barely enters into sense 1, and is entirely absent from the other senses. On the other hand, verbs akin in form and meaning occur in the Middle and Modern stages of the Teutonic langs. cf. late ON. (13th c.) *þikka*, *þjikka* 'to peck, prick' (Vigf), Norw. *þikka*, Sw. *þicka*, Da. *þikke* to pick, peck, pierce with pointed tool, also to beat, palpitate, throb; MLG, LG., E. Fris. *þikken* to pick, peck, MDu. *þicken* to pick, peck as a bird, pierce or strike with beak, cut with sickle or scythe (Kilian); Du. *þikken* to pick, peck; mod. Ger. (from LG.) *picken* to peck as a bird, pick or puncture with a sharp tool (also *þiken*, *þicken*). Compare also Welsh *þigo*, Corn. *þiga* 'to prick, sting, pick, peck' (said e.g. of a pin, a thorn, a bird), which goes with *þig* sb. fem. 'anything pointed, sharp point, beak, bill, neb', with similar forms in Breton, and a large family of derivatives and connected words, from the root *þik-*. All these words in the various languages go back to earlier forms in *þik-*, *þik-*, *þik-*; but the question of their ulterior history and relations is involved in obscurity and conflicting difficulties. The Romanic verbs point to an original form **picāre*, related to **picus*, *Sp.* *pica*, *F.* *pic*, for conjectures as to the origin of which see *Pike* sb. 1, note. In OE., *þicung* is supported by the sb. *þuc*, *þic*, *Pike*; but there are no cognate words in the other Teutonic languages in their early stage. In Welsh and Cornish, however, *þigo*, *þiga*, appear to be native words; going back, with the cognate sb. *þig*, to a Brythonic root *þik-*, corresponding perhaps to a proto-Celtic **qik-* (see *Pike* sb. 1, note). The modern Irish and Gaelic *pic*, *pioc*, and their derivatives are, of course, from English.

The two forms *þik* and *þike* might have been treated as separate words, as in the *Pick* 1, *Pike* 1. But in the inflected forms of the vb. in early times, the length of the *i* is often doubtful, so that the separation would be difficult; and in modern times, *þike* exists only as a dialect form of *þik*.

It is therefore most convenient to combine the two under the current literary form *þik*, separating the examples, where possible, under *a* and *β*, and stating in what senses *þike* continues in dialect use. Sometimes there is differentiation in S. E. Scotch, *þika* is distinct from *þik*, and used only in senses *a*, *β*, *γ*, *δ*, *ε*; but in other Sc. and Eng. dialects, and in earlier Sc., *þike* is used in other senses also.]

[Derivation obscure: perh an unexplained alteration of *F. piqueer* (16th c.) to *loage*, *maiad*, *pillage*, *plunder*, *pillfer*, f. *picarde* foraging, *marauding*, according to Hatz-Darm., ad. Sp. *peorera*, vbl. sb. from *peorera* to steal or carry off cattle, f. L. *pecus*, pl. *pecora* cattle. cf. med. or mod. L. *pecorare*, p. pple. *pecorantes* 'pillagers of cattle', cited by Littré, and *pecoria* ('duo prœdia, quæ secundum linguæ suæ (Flandicæ) consuetudinem pecoraria appellant') *Chion Affligemense* c. xx), in Du Cange. The chief difficulty in thus accounting for the word is the final stress, proved by rimes, and by the spellings, *peorera*, *peor*, *peor*. The occasional later *picqueer* is, however, suggest indeed the pronunciation *piqueer* but *piqueer* in 1510/1519 is *piqueer* from *piqueer*. Moreover, the Fr. word is not cited in the maritime sense, nor have we much evidence for the Eng. vii. in the sense 'to forage'.]

(Grimm's Dictionary is in error in ascribing to it an English origin.)

3. *attrib.* Pertaining to, or of the nature or character of, a picnic; in earlier use with reference to contributions made by each member of a party or company, as at a 'picnic' in the original sense.

†4. *as adv.* In the way of a picnic; by contributions from each person. *Obs.*

1803 J. DAVIS *Trav U S* 176 A sum that may enable him to ask a friend to dine with him *pic nic*

[Note The chronology of the word in French and English, with the fact that our earliest instances refer to the Continent, and are sometimes in the French form *pic-nique*, show that the word came from French (although some French scholars, in ignorance of these facts, have in view of the obscurity of its derivation, conjectured that the French word was from Eng.). Hatzfeld-Darmesteter merely say 'Origin unknown the Eng. *picnic* appears to be borrowed from French'. Scheler mentions several conjectures, amongst others that of Boniface (18) 'le pas ou chacun *picque* au plat pour sa *rique* (*rique* taken in the sense of "small coin"). Others think it merely a riming combination formed on one of its elements. In Foot's *Nabob* (1772) Act 1, one of the characters uses *pick-nack* for *pick-nick*, intended perhaps to show that *pick-nick* was still a little known word, liable to be confounded or associated with better known native words or combinations, such as *knack-knack*. But cf. PICKNICKERY quot. 1803, 'pick nickery and nick-nackery'.]

According to the chroniclers the Pictish kingdom was united with the Scottish under Kenneth MacAlpine in 843, and the name of the Picts as a distinct people gradually disappeared.

In Scottish folk-lore, the *Pehts* are often represented as a dark pygmy race, or an underground people; and sometimes identified with elves, brownies, or fairies.

[*Note.* Prof. Skeat suggests 'from the miscellaneous nature of its (i.e. the dish's) contents' which might recall the black and white or piebald appearance of the bird; others have thought of the habit which the magpie has of picking up and forming accumulations of miscellaneous articles. In this connexion, the similarity between the forms of the words HAGGIS and HAGGESS (f. *agace*, *agasse*) magpie, has also been pointed out. The quotations for the word afford no light, exc. that in one place in a late 17th c. L. poem *Modus cenandi* (Furnvall, *Babes Book*, ii. 36) l. 51, 'sunt inter fercula pice, Pastilli cum fartulis', appears to mean, 'let there be served between the dishes, pies, pasties' as if the writer identified *pice*, the dish, with *pice* the pie or magpie. On the other hand, in two early 17th c. quotations the Eng. word is used in Latin context, as if not identified with *pice*.]

Pie, pye, sb. Now only *Hist.* [The Eng. word answering to med. L. *pica*; thus both in L. and Eng. identical in form with the name of the bird: see *PIE* 1, and *PROA* 1.]

1. A collection of rules, adopted in the Reformation Church, to show how to deal (under each of the 35 possible variations in the date of Easter) with the concurrence of more than one office on the same day, accurately indicating the manner of commemorating, or of putting off till another time, the Saints' days, etc., occurring in the ever-changing times of Lent, Easter, Whitsuntide, and the Octave of the Trinity. (Cf. *Blades Caxton*, 1882, 240.)

It may be referred to the Greek *πίναξ* or *πίνακτιον*. But the Latin word is *pica*, which perhaps came from the ignorance of the friars, who have thrust many barbarous words into the liturgies. 1879 *MARQUIS OF BUTE Roman Breviary* I p. xii, As to anything else, see the Chapters of the Pye treating specially of each detail.

† 2. (Usually *pye* book.) An alphabetical index to rolls and records. *Obs.*

There are 'Pye Books' to Indictments extending as far back as 1660; but there is nothing to show when the term first came into use. It was in use in the Court of King's Bench early in the 18th century. It was also pretty generally used in the Courts of the Palatinate of Lancaster, the Indexes to the Affidavits, Declarations, and Sessional Papers being each styled 'Pye Books' (J. J. Cartwright, Sec. Publ. Rec. Office).

1768 *Chambers's Cycl.* (ed. Rees) s. v. In much the same sense the term was used by officers of civil courts, who called the calendars or alphabetical catalogues directing to the names and things contained in the rolls and records of their courts the Pyes.

3. A portion or quantity of any substance or kind of matter, forming a single (usually small) body or mass; a bit; as 'a piece of lead, granite, ice, bread, dough, cloth, paper'; also, *piece of water*, a small detached sheet of water, a small lake.

Such a 'piece' is, in fact, often a portion of a larger mass, but this is not thought of in the use of the word, the notion being rather that of so much of the substance or material in question forming one body of finite dimensions, which may be either a small or a large piece. It is a separate part or portion of the whole existing stock of the substance.

II. Technical uses.

7. An oblong mass of metal, as obtained from the smelting-furnace; an ingot.

In this connexion *sow* is found earlier viz. of lead 1487, of silver 1590, of iron 1612, *sow-iron* 1608, *sow metal* 1671. The original differentiation of *sow* and *fig* (if there was any) was prob. in the size, the smaller masses being called *figs*. The modern explanation, i.e. that the *sow* comes from the main channel, and the *figs* from derivative channels into which the liquid metal is run from the furnace (applicable only to iron) is a later adaptation of the terms to the development of the iron-industry, of which the earliest indication is in quot 1686 in d, where however 'sow' and 'piggs' may in themselves refer merely to size.

a. Generally. (Not now of gold or silver)

1630 J. TAYLOR (Water P.) *Prause of Hempseed* Wks iii. 65/1 Ships. That bring gold, silver, many a Sow and Pig. 1683 *London Gas* No. 1873/3, 150 Piggs of Silver. 1726 *Shelvelocke Voy round World* 312 We return'd for what we had of him some bales of coarse broad cloth, some piggs of copper. 1836-41 *BRANDEN CHAM* (ed. 5) 820 Cast into oblong pieces called piggs, which are broken up, roasted, and melted with a portion of charcoal. b. Of lead (the earliest use): now usually of a definite weight, see quot. 1823.

c. Of iron (now the chief use). see quots. Also, in mod. use (without a or plural), short for *pig-iron*. *Pig of ballast*, a pig of iron (rarely of lead) used as ballast.

d. Applied to the moulds or channels in the pig-bed.

1586 *Plot Staffordsh.* 162 They make one larger furrow than the rest, which is for the Sow, from whence they draw two or three and twenty others (like the labels of a file in Heraldry) for the piggs. 1805 [see *Pig-iron* 1] 1856 *RICHARDSON Suppl.* s. v. † Pigwiggin, -wi dgeon. Obs. Also pig wiggeon. Of obscure origin and meaning: see quotes. 1730-1785

Some have identified it with *Pigwiggen*, -wiggin, used by Greene and Nashe as a quasi-proper name, and by Drayton as the name of a fairy knight favoured by Queen Mab the wife of Oberon, also by Davenant. In Cotton it is apparently a term of contempt, and rimes with *biggin*, cap or hood. *Pigwiggin* (widgin) appears in Cleveland *attrib* as a contemptuous or hostile epithet for the Scotch, spelt by Bailey *wiggeon*, by Johnson *widgeon*, app. after the name of the bird. Its connexion with *Pigwiggin* is not proved. [1594 GREENE *Selimus* 1909 Now will I be as stately to them as if I were maister Pigwiggin our constable. 1596 NASHE *Saffron-Walden Wks* (Grosart) III 191 No more will I of his calling me Captaine of the boyes, and Sir Kilprick, which is a name fitter for his Piggden de wiggen, or gentlewoman. 1599 — *Lenten Stuffe* To Rdi, If it were so, Goodman Pig wiggen, were not that honest dealing? 1627 DRAYTON *Nymphidia* xii, Pigwiggen was this Fairy Knight, One word nor gracious in the sight Of fair Queen Mab, which day and night He amorously observed. 1629 DAVENANT *Albion* II 1 D3, *Albo* Is not your name Pigwiggin? *Cuny* Pigwiggin! your Grace was wont to call me Cunymond I am no Faery. 1675 COTTON *Scoffer Scoff* 68 What such a nazarly Pigwiggin, A little Hangstrings in a Biggin?

Pike (pəik), sb. 1 Forms: 1 pike, 1, 3 pike, 3-4 pike, 3-6 pyk, 4-7 (9) pyks, 4- pike.

[Found in OE. as *pic* (8th c.), *pic*, in ME. *pik* (pl. *pikes*), later *pyke*, *pike*; beside which there existed from 14th c., in same senses, a collateral form with short vowel, *pic*, *pik*, *pykk*, now PROK sb. 1 Cf. PROK v. 1, with its collateral form *pke*.

In mod Eng., in sense 1, *pke* is now local or dial., *pik* being in general use, but senses 2 and 3 are in general Eng. *pke*, while *pik* is obs. or dial., sense 4 is now generally *peak*; sense 5 is dial. or local. OE. and ME. *pic*, *pic* agree in form and sense with F. *pic* (of which, however, examples are known only from the 12th c.). In the earliest instances, both in OE. and OF., *pic* was applied to a pick, pickax, or pick-hammer, with handle at right angles to the head; but, in both, the word was soon applied to a straight instrument or tool pointed at one end, or to the sharp point of such (cf. OE. *hornpik* a pinnace, in *Lindisf. Gosp.* Matt. iv 5), as in Fr. to a poker, a glass-blower's tool, the end of a ship's yard, etc. The Eng. uses are not the same, but the development is on the whole parallel. See Note below.]

[Note. The etymology of *pike*, with the related *Pick sb.*, *PRICK sb.*, and the vbs *PICK*, *PICK*, *PICK*, presents many difficulties. OE. *pic*, ME. *pic*, seem to be the same word as OF. and mod.F. *pic*, corresp. to Prov. *pic*, Sp. *pic*, Pg. *pic*, all applied to something sharp pointed, and having a cognate vb., *F. piquer*, Pr. *Sp.* *picar*, It. *piccare*, to pierce, prick, sting, etc. The origin of this Romanic family is disputed. Diez referred it to *L. picus* the woodpecker, in reference to the action of the long and powerful beak with which that bird hammers, picks, and pierces the bark of trees. The phonetic difficulty that the *c* of *L. picus* and a derived **pick* would not remain in the mod. langs., but be lost in *F. (pi, puer)*, and elsewhere become *g*, has been met by the suggestion that the group, being of echoic origin, retained the *c* or *h* unchanged, or that late *L.* had, beside *picus*, the popular forms **picus* and **picus* (peih due to echoic modification), which would phonetically give the modern forms. Celtic origin or influence has also been suggested. Welsh *pic* anything pointed, pointed end, point, pike, beak, bill, with its cognate vb. *thio*, Cornish *figa* to prick, sting, pick, peck (said of a thorn, a bird, etc.), and a large group of connected words in Welsh, Cornish, and Breton, point to an original *pic*, the Brythonic cognate of *OL. pic* (Proto-Celtic **gik*), found on the OIr. gloss *cich 1. ger* (i.e. 'sharp') from the *Book of Lecan*, printed by Stokes in *Archaeo. J. Celticae Lexicographia* I 59 (note on 73). In the Teutonic langs. OE. *pic* appears to stand alone in the early period. ON. had *pic*, app. as a personal nickname (*Ilakon pic*) in 12th c., and as a common noun *pic* a pikestaff c1330; in same sense MSw. had *pic*, and 13th c. Norw. had *picstaf*, mod. Sw. and Norw. *pic*, M.Da. *pic*, Da. *pic* pike, point, prick. The probability appears to be that these were adopted from the same source as *Eng. pike*. See also *Pick sb.*]

Pike (paik), *sb.* ² north. *Eng.* Also 3, 7 *paik*, 6 *pyke*. [app. either a local application of *PIKE sb.*, or of Norse origin: cf. West Norw. dial. *pih* a pointed mountain, *pihtind* a peaked summit.]

1. A northern English name for a pointed or peaked summit, or a mountain or hill with a pointed summit; enclosing extensively into the nomenclature of mountains and hills in and around the English Lake district.

The names in *Pike* have their centre in Cumberland, Westmorland, and Lancashire above the sands, where are Scawfell Pike, Langdale Pikes, Pike of Stickle, Causey Pike, Grisedale Pike, Red Pike, White Pike, Wansfell Pike, etc., they gradually thin off in the surrounding counties, example, being Rivington Pike in mid Lancashire, Backden Pike, Pinnar Pike, Haw Pike, in Yorkshire, Pontop Pike, West Pike, in Durham, Glanton Pike, East Pike, West Pike, Three Pikes, in Northumberland, Hartshorn Pike, The Pike in Roxburghshire, The Pike in Selkirkshire, etc. It is notable that the *pikes* are localised in the district of England characterized by Norse topographical names, the country of the *becks, fells, fens, ghylls, hows, rags, scars, screes, throats, and fays*, that the name is ancient, as old as sense 2 of *PIKE*, and that *pic* is used in precisely the same way in West Norwegian dialect.

b. A cairn or pillar of stones erected on the highest point of a mountain or hill; also, a beacon, tower, or pile on an eminence.

Many of the natural pikes (e.g. Rivington Pike) were beacon hills, hence the name appears to have been sometimes associated with a beacon.

1751 in E. Baines *Hist. Lancs.* (1888) II. 333 [Inscription on a conical pillar on the summit of Hartshead Hill, 8 miles ENE of Manchester.] This Pike was rebuilt by Public Contributions, Anno Dom. 1751. a1825 in *Pennine Club's Wks.* (1825) 49 note, These piles of stones are often termed Cairn, Pike, Curnough, Cross, &c. 1866 T. 2. A pointed or peaked stack of hay, made up (of a number of hay-cocks) temporarily in the hay-field, until it can be carted to the farm-yard; also, a stack of corn, circular in form, pointed, and of no great size. (*Eng. Dial. Dict.*)

† **Pike** (paik), *sb.* ³ *Obs.* Also 6-7 *pick* (e, 7 *pick*; see also *PICK*, *PICO*. [ad. Sp. *pico* beak, bill, nib, peak, Pg. *pico* summit, top, cf. also mod. F. *pic* in same sense. Distinct from *PIKE sb.*, as being of much later introduction, and of general, not local, use, and as having at length passed into *peak*, while the northern Eng. word remains *pike*.]

1. The earlier form of *PEAK sb.* (sense 5), the conical summit of a mountain; hence in the name of certain mountains of conical form. Used first in the name *Pike (Packed) of Teneriffe*; also in other geographical names, as *Adam's Pike*, *Pike of Daman*, etc., in all of which *PEAK* has now taken its place.

The name *Pike of Teneriffe* appears in Eden 1555 (as *pick*), and was prevalent during 16-17th c.; the modern equivalent *PEAK* appears in 1634, and prevailed after 1700, though the older *pike* occurs as late as 1776. In French, Thevenot used in 1663 the Spanish form *pico* (see *PEAK sb.* 5, quot. 1587). *Pic* occurs first in 1690 in *Furetiere*, 'mot. qui se dit en cette phrase, Pic de Teneriffe ce mot vient de l'espagnoil *pico*, qui signifie montagne'; it is not in *Richelet* 1680, but appears in ed. 1693; it was admitted into the *Dict. Acad.* in 1740, with the instances 'pic de Teneriffe, pic d'Adam, pic du Midi'. But locally, *pic* was used in the Pyrenees, and is found in *Provençal* in 14th c.

[French has also *à pic* in the same sense, cited before 1600, and it is a question in which language the phrase arose. But it is probable that in the phrases on (*the*) *pike*, on (*the*) *pike*, *a-pike*, later *a peak*, we have the same word as in sense 1, with its later form *PEAK sb.* 5, the connexion between *pike* = summit, and *a-pike*, being analogous to that between *vertex* and *vertical*, *ally*.]

1. A large, extremely voracious, freshwater fish of the northern temperate zone, *Esox lucius*, with a long slender snout; a jack, lue; among anglers the name is sometimes restricted to a specimen of a particular age or size (see quot. 1840-70, and

PICKEREL I quot. 1587). Hence, by extension, any fish of the genus *Esox* or of the family *Esoxidae*.

Among N. American species are the Federation Pike, *Esox americanus*, Great Pike, *E. nobilior*, Hump-backed Pike, *E. cypha*.

In later times the simple form of the pike was sometimes modified, as by the addition of a lateral hook; and the name has been also loosely applied to forms of the halberd and to the half-pike or spontoon, formerly carried by infantry officers.

Governor Bradford in 1630 wrote of his company as 'pilgrims' in the spiritual sense (sense 3) referring to Heb. xi. 13. The same phraseology was repeated by Cotton Mather and others, and became familiar in New England. In 1798 a Feast of the 'Sons' or 'Heus of the Pilgrims' was held at Boston on 22 Dec., at which the memory of 'the Fathers' was celebrated. With the frequent juxtaposition of the names *Pilgrims*, *Fathers*, *Heirs* or *Sons of the Pilgrims*, and the like, at these anniversary feasts, 'Pilgrim Fathers' naturally arose as a rhetorical phrase, and gradually grew to be a historical designation

OE. *piller*, var. of *pull*, *pull* 'pool, creek' (Bosw.-
Toller): cf. OE *pōl*, Welsh *puil* pool.] A local
name, on both sides of the Bristol Channel, on the
lower course of the Severn, and in Cornwall, for
a tidal creek on the coast, or a pool in a creek or
at the confluence of a tributary stream.

All the examples of *puil* and *puil* in the charters in

Kemble's *Cod. Dipl.*, refer to the Severn estuary or valley;
so that, although no ME. instances have yet been found,
the identity of the OE. and 16th c. word seems certain.

Pill (pɪl), *v.* 1 Forms: a. 2 *pyllan*, 3 *pillen*,
3-5 *pille*(n), 4-5 *pylle* β 4-6 *pille*, *pylle*, 4-7
pil, (6 *pyll*, *pyll*), 4- *pill*. [Found in late OE.
(12th c. MS.) in inflected form *pyllē*, in early
13th c. as *peolien*, *pullen*, 1300-1450 *pilen*, forms
which point to an OE. **pilun*, *pyllan*, varying
with **pollan*, *peolan*: cf. *clipian*, *clȳp*, *clȳp*,
clȳp-. *Pile*, with single *l* (usually *pīle*), is found
down to c 1450, when it was displaced by *pill* and
pelle, both of which had appeared in R. Brunne
(1303-30). *Pill* and *pelle* (now **PEEL** v. 1) continued
as synonyms in all senses down to 17th c., when
peel became the general Eng. form in branch II,
pill now surviving only as a literary archaism,
chiefly in sense 1; but, in the dialects, *pill* is
widely used in the sense 'peel' (decocticate). No
cognate words are found in Teutonic. OE. *pilian*
was prob. ad. L. *pilare* to make bare of hair, and
(prob.) of skin: cf. the compound *depilare* to
make bald of hair or feathers, also to strip of the
skin, to peel (Vulg., Ezek. xxi 18), fig. to pluck,
plunder, fleece, cheat; also OE. *peler* to make bald,
to peel or skin (the latter sense now usually referred
to OF. *pel*, L. *pell-em*). It. *pelare* to make bald,
skin, fleece, flay. With OE. *phian*, from L. *pilāre*,
cf. OE. *plantian* from L. *plantāre*, etc.

The early ME. *pīle* (usually *pīle*, but R. Brunne rim-
s *begitied, pīled*) regularly represented OE. *pilian*, but *pilian*
naturally gave *pele* (cf. *clēphan*, CLFPE), which was pro-
bably identified with F. *peler*. The later *pīl* (for *pīle*) was
prob. influenced by F. *piller* (= *pi*, *Sp. pillar*, *Py. pil-
har*)—late L. *pillāre*, found in med. L. (Du Cange) for L.
pilāre to pillage, plunder. But no differentiation of sense
between *pīle*, *pūle*, *pelle* is found in ME., nor between *pill*
and *peel* in early mod. Eng. and existing Eng. dialects. It
is possible however that the influence of F. *piller* and *peler*
is to be seen in the tendency since 17th c. to differentiate
pill and *peel* (so far as *pill* has survived) in literary use.]

† 5. A portable pillar borne as an ensign of dignity or office. *Obs.* exc. *Hist.*

Two of these, of silver gilt, were borne by pillar bearers before Cardinal Wolsey and Cardinal Pole. They are not recorded otherwise, and appear to have been substituted by Wolsey for the silver mace or stick with a silver (or gold) head, to which a cardinal had a right, and to have been retained by Pole. Representations of Wolsey's pillars, sometimes borne by guffins, sometimes crossed in saltire with an archbishop's cross between, occur in the decorations of Christ Church, Oxford. Those of Pole are represented in the illumination on the first page of his Register of Wills at Somerset House, they are figured as Corinthian columns with capital and base, about the size of Roman fasces, 3½ to 4 ft long.

A contrivance for the punishment of offenders, consisting usually of a wooden framework erected on a post or pillar, and formed, like the stocks, of two movable boards which, when brought together at their edges, leave holes through which the head and hands of an offender were thrust, in which state he was exposed to public ridicule, insult, and molestation. In other forms, the culprit was fastened to a stake by a ring round his neck and wrists. (In quot. a 1380, the name is applied to the cross.) The Chinese *canque* is a species of portable pillory.

In Great Britain the punishment of the pillory was abolished, except for perjury, in 1815, and totally in 1837. In Delaware, U.S., it was not abolished till 1905.
